

NO to ACTA!

*We won't let this secret treaty
censor **our** Internet and
endanger our freedoms!*

ACTA is:

An agreement secretly negotiated by 39 countries to bypass international organizations and democracy.

Privatizing repression by pushing Internet companies to control our communications and censor the network in the name of an obsolete copyright regime.

Criminal sanctions for cultural practices, targeting technologies for non-commercial sharing and harming innovation.

Setting in stone 15 years of failed repressive policies, preventing an urgent copyright reform in favour of the public and artists that would legalise not-for-profit sharing of culture.

We must act!

*Members of the **European Parliament**
still have a chance to **reject ACTA!***

Vote INTA: 21 June, Final vote: 3, 4 or 5 July
