

NO to ACTA!

*Don't let a secret treaty
put **our** Internet
under control of major companies!*

ACTA is:

An agreement secretly negotiated by 39 countries to bypass international organizations and democracy.

Privatizing copyright repression by pushing Internet actors to control our communications and censor the network.

Criminal sanctions for cultural practices, targeting the means for non-commercial sharing.

Setting in stone 15 years of “war against sharing” **repressive schemes**, preventing copyright reform in favour of the public and artists.

We must act!

*The European Parliament
still has a chance
to **reject ACTA!***
